### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1, 4-6, 8-24, 27-29, and 31-47, are rejected under 35 U.S.C. 102(b) as being anticipated by Huff et al., International Publication Number WO 99/57625.

With regard to claims 1, 9, 10, 15, 16, 21, 24, 28, 29, 32, 33, 39, 44, and 47, Huff discloses a medium which performs the steps of monitoring communication requests (page 4 lines 17-22), outputting a notification in case of an abnormality (page 5 lines 2-5), selecting a countermeasure from a database (page 12 lines 15-21) which manages content of notification and corresponding countermeasure (page 12 lines 26-29), and taking a countermeasure against the abnormality (page 5 lines 13-16) based on the selected countermeasure (page 5 lines 13-14), an information collection unit collecting information such as kind (page 20 lines 8-26) content (page 21 lines 14-15) order (page 20 lines 23-26) and time (page 17 lines 25-28) of multiple proceeding communications, and a reflecting unit which reflects the information to a database (page 21 lines 6-13) which selects a countermeasure based on mounting information and security information (page 5 lines 9-16).

With regard to claims 4, 8, 27, and 31, Huff discloses the configuration can be set (page 12 lines 1-15, lines 21-29).

Application/Control Number: 09/955,972

Art Unit: 2134

With regard to claims 5, 6, 14, 28, and 37, Huff discloses multiple systems networked together (page 22 lines 20-24).

With regard to claims 11-13, 17, 19, 22, 34-36, 40, 42, and 45, Huff discloses the security server is available through the Internet (page 9 lines 1-16, page 12 lines 21-29).

With regard to claim 18, 20, 41, and 43, Huff discloses the request is in response to a request of a user (page 17 lines 14-22).

With regard to claims 23 and 46, Huff discloses a dummy database (page 21 lines 22-25).

## Response to Arguments

3. Applicant's arguments filed 20 December 2006 have been fully considered but they are not persuasive. Applicant argues that the invention implements a counter measure before the actual attack is started to minimize damage, while Huff discloses a computer system that can detect and take countermeasure against actual or suspected misuse. Applicant goes on to argue that Huff is not capable of taking significant offensive or countermeasure actions to halt the intrusion, but that a protection operation is carried out only after the detection of an event.

The examiner points out that Huff does disclose offensive countermeasure (page 21 lines 6-13), and that these countermeasures are taken against intended intrusions (page 20 lines 19-26), and does not only react after an attack is successful. The examiner also points out that a predicted attack could be a later stage of an already executing attack. A current attack is a proceeding process of an attack if a virus is going to cause more damage. Huff discloses not only taking action against suspected intruder

Application/Control Number: 09/955,972 Page 4

Art Unit: 2134

(page 1 lines 2-5), but also to half further intrusion (page 4 lines 15-16), which are is a predicted attack to be avoided beforehand.

#### Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacob Lipman whose telephone number is 571-272-3837. The examiner can normally be reached on M-Th 7 AM-3 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory Morse can be reached on 571-272-3838. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
